### Security Findings

**SQL Injection Vulnerabilities:** 3 critical vulnerabilities identified

**Missing Security Headers:** 149 security headers missing

### Accessibility Findings

**Color Contrast Violations:** 392 WCAG 2.1 violations

**Form Accessibility:** 100% of forms lack proper labels

### Performance Findings

**Load Handling:** 100% failure rate under concurrent load

## **Executive Recommendation**

**IMMEDIATE ACTION REQUIRED:** The JIRA 10.3 upgrade contains critical security vulnerabilities and performance issues that pose significant risk to Sony Music's operations. Deployment should be blocked until all critical issues are resolved.

### **Next Steps:**

- Escalate security findings to development team immediately
- Require accessibility compliance before deployment
- Conduct performance optimization and re-testing
- Schedule executive review meeting within 48 hours
